6 EASY STEPS TO PERFECT BREADING

1

Place cleaned and trimmed product into cool water to help breading adhere properly. (Not necessary if using a marinade.)

2

Drain before breading.

3

Dump product into breading. General rule: 1 lb (0.45 kg) breading to 10 lb (4.5 kg) of product.

4

Toss product in breading using both hands. Coat thoroughly. When breading wings, tuck wing tip by bending around and behind end wing segment.

5

Remove excess breading by holding one piece in each hand and tapping knuckles of each hand together.

6

Place breading product skin side up on sheet pan with grid. When breading chicken, group like parts together.
