Heated Holding Cabinet

Above: HHC 903 halfsize heated holding cabinet with CDT control

Left: HHC 902 stacked from two HHC 903 units. Stacked models are completely assembled at the factory.

Henny Penny heated holding cabinets keep hot foods safe and appetizing prior to serving.

The 900 series holding cabinets were developed to hold large quantities of pressure-fried chicken for long periods of time without sacrificing freshness or presentation. The key is even heating and constant circulation. Dual fans and ventilated side racks allow hot, moist air to circulate evenly throughout the cabinet. This helps keep practically any menu item hot and tasty until serving and translates into higher food quality with less waste throughout the day.

Henny Penny holding cabinets also improve equipment and labor utilization. With proper holding capability, foodservice operators can cook in quantity before peak periods and stock service cases directly from the holding cabinet.

HHC 903 Half size HHC 902 Stacked

The HHC 903 is a half-size mobile heated holding cabinet designed to provide excellent holding for lower volume and cost. It can be stacked as the HHC 902 to double your holding capacity in the same footprint and provide the versatility of two entirely separate holding environments and control sets.

Fully insulated cabinet and tightsealing door help you enjoy the benefits of high quality holding while using very little energy. Many operators see a net reduction in overall kitchen energy costs.

Partial pan removal, self-closing door and magnetic closures contribute to convenient work flow and energy savings. Time 5 shelves separately with available Countdown Timer (CDT) control.

Standard Features

- Choice of Countdown Timer control Dual heavy-duty blower motors or Electro-mechanical control
- Countdown Timer control features 5 independent programmable timers with:
 - Single switch start/stop/abort, manual override and power-out memorv
